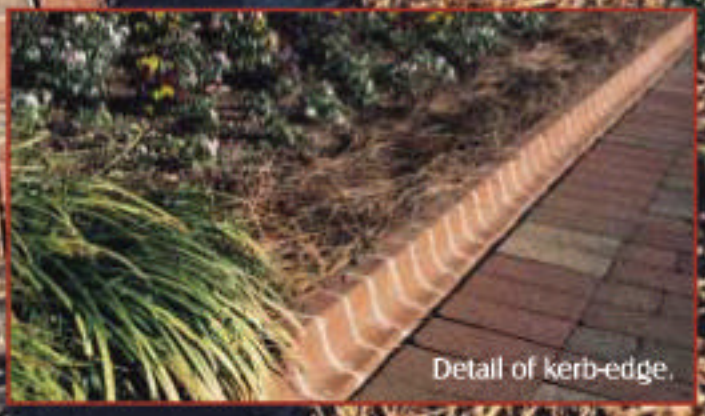
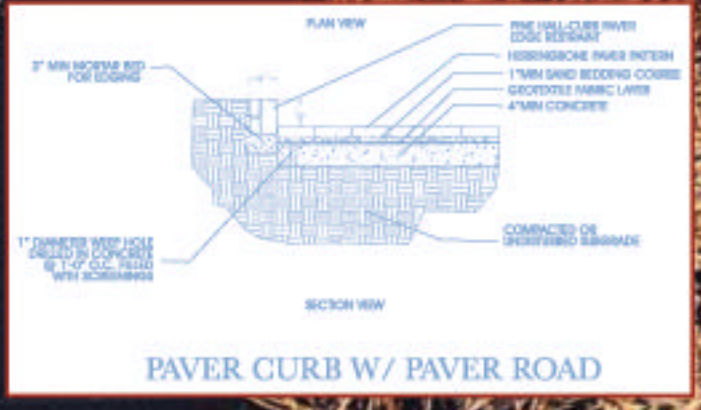
Pine Hall Brick

America's Premier Paver®



Detail of kerb-edge.



PAVER CURB W/ PAVER ROAD

Challenge:

When designing the bag drop-off area for the Pinehurst Resort, The Hayter Firm was faced with the problem of creating a barrier free space that eliminated the conflicts between cars, golf carts, Resort vehicles and pedestrians.

Entry Plan Pinehurst Resort Club
Robert Hayter ASLA

Solution:

"To define traffic patterns and separate uses, a series of planters using kerb-edge were designed. These planters effectively created a transition zone between the car parking area and the pedestrian path. The kerb-edge provided a continuity of material and a subtlety of scale that related well to the pedestrian nature of the space." – Robert Hayter

Materials used: English Edge® FR Heavy Duty, Kerb-Edge Paver Restraint, RWT-3 Bullnose Paver Restraint.
